

**STRONGER.
SAFER.
SMARTER.**

UNMATCHED PROTECTION

InsulShield's proprietary solution creates one of the strongest bonds, keeping your home protected for decades.

UNMATCHED PERFORMANCE

Proprietary heat-reflecting pigments protect your home from damaging UV rays and reduce heat transfer through walls.

UNMATCHED WARRANTY

InsulShield comes with a 25-year transferable warranty, ensuring long-term protection and peace of mind for you and future homeowners.

INFUSED IR PIGMENTS

InsulShield features military-grade IR pigments, engineered to reflect heat and UV rays. These advanced pigments protect your home, preserve color, and extend the life of the surface unlike ordinary paint.

What That Means for You:

- Reflects heat instead of absorbing it
- Preserves color longer than traditional paint
- Protects your home from UV damage
- Extends the life of both the coating and the surface beneath

A GREAT INVESTMENT

InsulShield isn't just paint—it's protection that pays for itself. Unlike traditional paint, InsulShield adds insulation, reflects heat, and strengthens your home's exterior. That means lower energy bills, fewer repairs, and long-term savings—all while looking great. It's not just a coat of color; it's an investment in comfort, durability, and value.

25 Year Total Cost Traditional Paint vs. InsulShield

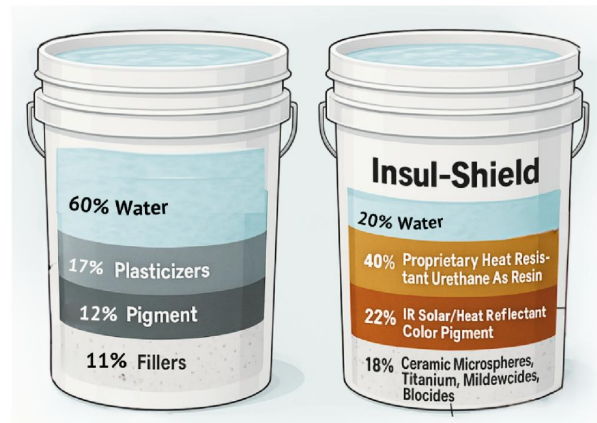

InsulShield™ is a high-performance exterior coating engineered to fortify your home against the elements, enhance its beauty, and improve energy efficiency. With advanced science behind every drop, InsulShield™ gives you confidence that your investment is protected—today, tomorrow, and for years to come.
